

GLUTEN-FREE RECIPE

WITH SALMON

## FAMILY PLUS

Special nutrition for bitches and puppies

Tasty food for our mothers-to-be and puppies: This special formula not only covers a bitch's special requirements, from the last trimester of gestation until the end of the nursing period; it also supplies puppies, whether still in the womb or being nursed, with all the necessary nutrients. Later, the nutritious kibble can be softened in **JOSERA puppy milk** or water to help the puppies transition to solid food.

- Contains plenty of energy and protein for pregnant and nursing bitches
- With taurine for fertility and valuable antioxidants to support the highly metabolic reproductive organs
- Supports puppies' brain development thanks to high-quality fatty acids from salmon
- Soakable kibble to wean puppies onto dry food

### Reproduction

Optimised for bitches during gestation and lactation due to the presence of L-carnitine and a higher energy content. Valuable nutrients support the puppies' development, whether in the mother's womb or via her milk.

### Optimal development

Valuable fatty acids from salmon support brain development. L-carnitine and high quality proteins promote strong, lean muscles. Taurine and L-carnitine are important nutrients for the heart.

### Soakable kibble

The kibble size is especially small and can be soaked with water for a better transition to solid food.

Packaging size: **15 kg**

#### Analytical constituents:

Protein	%	30.0
Fat content	%	22.0
Crude fibre	%	2.5
Crude ash	%	6.2
Calcium	%	1.35
Phosphorus	%	0.95
Sodium	%	0.30
Magnesium	%	0.09
Metabolisable energy:	MJ/kg	17.4
	kcal/kg	4159

#### Nutritional additives per kg:

Pantothenic acid	mg/kg	50
Niacin	mg/kg	90
Folic acid	mg/kg	5
L-carnitine	mg/kg	200
Taurine	mg/kg	1000
Biotin	mcg/kg	1000
Vitamin C	mg/kg	200
Iron (ferrous sulfate, monohydrate)	mg/kg	220
Zinc (zinc chelate of glycine, hydrate)	mg/kg	180
Manganese (manganese-(II)-oxide)	mg/kg	20
Copper (cupric chelate of glycine, hydrate)	mg/kg	18
Iodine (calcium iodate, anhydrous)	mg/kg	2.2
Selenium (sodium selenite)	mg/kg	0.35

#### Nutritional additives per kg:

Vitamin A	I.U./kg	24000
Vitamin D3	I.U./kg	1800
Vitamin E	mg/kg	220
Vitamin B1	mg/kg	15
Vitamin B2	mg/kg	20
Vitamin B6	mg/kg	20
Vitamin B12	mcg/kg	100

#### Technological additives:

Antioxidants: tocopherol extracts of natural origin.

### Feeding recommendation:

adult* 24 h	Puppy / Age in weeks			Bitch/6th-9th gestation week
	3-4	5-8	> 8	
5 kg	20-35 g	35-55 g		
10 kg	40-75 g	75-130 g		
20 kg	55-110 g	130-215 g		
30 kg	75-190 g	190-280 g		
40 kg	95-240 g	240-390 g		
60 kg	110-260 g	280-515 g		
80 kg	140-320 g	320-465 g		
MinisBest, SensiJunior, Kids or YoungStar				
5 kg	120-130 g			
10 kg	215-235 g			
20 kg	390-410 g			
30 kg	550-580 g			
40 kg	690-710 g			
60 kg	980-1045 g			
80 kg	1165-1305 g			

\*Recommended amounts are per day. The recommended amounts are based on the weight of the adult dog.

#### Complete feed for bitches and puppies.

**Composition:** dried poultry protein; rice; whole grain corn; poultry fat; dried salmon 6.0 %; beet fibre; hydrolysed poultry protein; plant fibre; minerals; ground chicory root (natural source of inulin).

**\*\*Lactating bitch:** If required, food can be made available in unlimited quantities (ad libitum). The bitch's nutritional needs are determined by the number of puppies and milk yield. **Pregnant bitch:** Please note that the feeding requirements in the last third of the pregnancy depend on the breed size and the number of puppies. In view of possible birth difficulties and disorders during lactation, overfeeding of the bitch should, however, be avoided at all cost.
